KVR Solutions, Inc. Earns Microsoft Small Business Specialist Designation

Positions Company as Strong Technology Partner for Small- and Medium-Sized Businesses

Ocala, Florida, USA — March 31, 2006 — KVR Solutions, Inc. today announced it has been awarded the Microsoft designation of Small Business Specialist. The designation identifies the company as highly qualified and competent for addressing the Information Technology needs of small and medium sized businesses.

To qualify as a Microsoft Small Business Specialist, KVR Solutions earned a competency from Microsoft in “Designing, Deploying, and Managing a Network Solution for Small and Medium-Sized Business.” The company also completed a Microsoft Small Business Sales and Marketing Assessment evaluation. In addition to positioning the company as a specialized business partner, KVR Solutions will also receive points toward maintaining its Microsoft Gold Certified Partner status.

Kevin L. Reed, President of KVR Solutions, said the qualification was sought after because the company has identified smaller businesses as an important market.

“For smaller companies, technology is not just a useful tool anymore. It’s a necessity,” Reed said. “In our area, small- and medium-sized businesses are vital to the growth of our community, so providing for their needs and contributing to their success benefits the entire community.”

KVR Solutions, Inc. is a technology consulting company with proven expertise and experience. It is their mission to be the leader in enabling organizations to be more efficient and effective through the intelligent application of technology. Their range of core competencies allows KVR Solutions to address

any and all of the Information Technology needs of their customers in today's rapidly changing business environment. KVR Solutions can be reached in their downtown Ocala office at (352) 622-0001 or on the web at www.kvrsolutions.com.
